PantoMove

What Educators, Parents and Occupational Therapists are saying about the PantoMove

Regina Public Schools has standardized on the VS PantoMove chair for all students in grades 3-12. Following a rigorous evaluation process by our teachers and occupational therapists the PantoMove was deemed the best chair from an ergonomic and self-regulatory perspective. On the facilities management side, it allows the school board to purchase 2 chairs sizes while ensuring correct student ergonomics and surpassing our durability expectations.

Ron Christie
General Manager, Educational Facilities

The Pantomove chair provides constant movement through space in small increments, giving the brain a continuous background of data for alertness and focus. The support of the chair adjusts the posture in a natural and comfortable way, activating the core muscles without strain.

Kim Barthel
Occupational Therapist

This chair is the most comfortable chair I have ever sat in. When I was in it I felt supported and grounded. I could, however, give myself gentle movement in all directions, as needed!

Marc Landry
Occupational Therapists in Vancouver

The PantoMove Chair has been a huge asset to our 9 year old son, who struggled to maintain focus in school for years. Like a lot of kids his age, he found the chairs in school uncomfortable and hard to sit still in for 6 hours a day. We took the initiative to supply him with his own PantoMove Chair, hoping that it would improve his attention by allowing him more flexibility while sitting. He loves it and the fact that it doesn't look that different from the other chairs already in his class. After a short time using the chair, his teacher was so impressed with his improvement that she was recommending the chair to other parents whose children had trouble sitting still as well. His grades improved significantly and we can't say enough about the positive effects that it has had on him. We are so impressed with all the products that VS has designed, we even put a few Hokki stools in the kid's rooms and office because we all like sitting on them.

Thank you VS.
Parent of 9 year old boy
